

24 7 means for responding to the exception to indicate a subsequent
8 operation to be taken with respect to the translated host instruction
9 before accessing the address.

Remarks

In this preliminary amendment, applicants are amending the specification to indicate that the application is a division of the parent application, canceling those claims allowed in the parent application which is about to issue, amending the claims remaining in this divisional application to bring them to the state at which they existed in the parent, and offering to add a new Figure 12 which is identical to Figure 12 added to the parent with the Examiner's approval. A copy of that Figure is provided with this amendment.

As previously discussed in the parent application, the prior art does not disclose, teach, relates in any way to, or suggest the inventive combination. Since all claims now in the application appear to be allowable, the allowance of those claims, as amended, and the issuance of the application as a patent are respectfully requested.

Respectfully submitted,

Stephen L. King
Attorney for applicants
